1. There were still about 30 Pe-2s at the Strausberg (N 53/V 15) airfield on 22 July 1950. Some biplanes were in a hangar. * There was much flying activity except during the period between 12 and 15 July 1950. The twin-engine planes took off in elements of two to practice bombing at Froetzeler Heath. The biplanes flew at night and, when coming in to land, signaled with one short and three long flashes from their navigation lights. Truck [REDACTED] were seen at the field. Some small-scale grading work was being done on the edge of the landing field, but there were no indications that a runway is to be constructed.

2. The field was still occupied by about 30 Pe-2s and some biplanes. Only a few flights were made. *

* [REDACTED] Comment. The number of planes at the field has not changed since early July 1950. [REDACTED] The field is occupied by one bomber regiment of a bomber division. The other two regiments of the division are stationed in Werneuchen.

This document is hereby regraded to **CONFIDENTIAL** in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
